Do I need all my content ready & prepared first?

Development · https://computancy.co.uk/kb/do-i-need-all-my-content-ready-prepared-first/

No, although having a clear idea is super beneficial!

We can get started by using placeholder content - known as 'Lorem Ipsum' or fake Latin - while you finish your content. This gives you guidance on the layout of text and content that would look best on your website.

If you don't have content - perhaps you are a new business - we can source stock content for you. These are usually not free as you'll need to license them, but they are not too expensive, and we'll agree on which ones to buy on your behalf before we do.
