Does the email migration delete any emails?

Migrations · https://computancy.co.uk/kb/does-the-email-migration-delete-any-emails/

No, the email migration won't remove any emails from the mail server where emails are being migrated from or any emails on the computancy mail server.

It's a 'non-destructive' form of migration, so emails won't be duplicated or deleted. Changes will simply be added into the emails already at computancy.
