How do I change the contact details on my .com and .co.uk domain names?

Domains · https://computancy.co.uk/kb/how-do-i-change-the-contact-details-on-my-com-and-co-uk-domain-names/

Changing the contact details for a domain that you have registered with computancy is usually done in either of two ways. This depends on what type of domain name you have.

For a .com domain:

1. Go to **Manage Domains**, locate the domain name you would like to change the contact details for and select **Manage**
2. Select **Contact Details** and you will be able to update the contact information for the domain name.

For .uk domains (including co.uk):

1. You'll need to login to Nominet. Head to https://secure.nominet.org.uk/auth/login.html and login or create an account by selecting **First time logging in or forgotten your password?**. Enter the email address you used to register the domain. You'll then get an email prompting you to set up a password.
2. Use the password you create to log in. You'll be shown a list of your .uk domain names. Choose which one you want to change the contact information for and **Edit**.

Note: There is a cost to change the contact details .uk domain names of around about £10 (enforced by Nominet).
