How do I create an email signature in webmail?

Webmail · https://computancy.co.uk/kb/how-do-i-create-an-email-signature-in-webmail/

To create an HTML or plain text email signature that will be appended to all emails:

- Select **Settings**
- In the left column, select **Identities**
- In the next column along to the right, click on the email address for which you want you to create or edit a signature
- Fill in signature details as necessary
