How do I import a .sql file via phpMyAdmin?

Databases · https://computancy.co.uk/kb/how-do-i-import-a-sql-file-via-phpmyadmin/

You can use phpMyAdmin to import an .SQL file with your database information. To do this:

- Log in to your database via phpMyAdmin (**Manage Hosting** > **[select package]** > **phpMyAdmin**)
- Choose the database you want to import your .SQL file to from the left hand side.
- Click the **Import** tab at the top of the page.
- Select **Choose File** and locate the .SQL file on your device or computer.
- Click **Go**

The .SQL file will be uploaded and imported to the database you've selected.

Our shared web hosting offers 1 GB MySQL databases.
