How do I set up email on my iPhone?

Email accounts · https://computancy.co.uk/kb/how-do-i-set-up-email-on-my-iphone/

To set up your computancy mailbox on an Apple iPhone or iPad, you need to:

- Head to the **Settings** icon and locate the **Accounts & Passwords** option.
- Then select **'Add Account'**.
- Select **Other** from this list.
- Input the information requested:

Name: Anything

Email: example@yourdomain.com

Password: Mailbox Password

Description: Work, Business...etc

IMAP:

Incoming Mail Server

Host Name:

imap.yourdomain.com

Username: example@yourdomain.com

Password: Mailbox Password

Outgoing Mail Server

Host Name:

smtp.yourdomain.com

Username: example@yourdomain.com

Password: Mailbox Password

- Finally, select the mail account and go into the **Outgoing Mail Server** settings. Select **Primary Server**, make sure **SSL is switched on** and the port is set to **587**.

Email should now be set up on your iPhone or iPad.
