What details should I use for a WordPress SMTP plugin?

Email accounts · https://computancy.co.uk/kb/what-details-should-i-use-for-a-wordpress-smtp-plugin/

The best SMTP details to use when configuring an SMTP plugin within WordPress when you're using computancy WordPress hosting are:

Outgoing mail server:

smtp.yourdomain.com

Outgoing server port (SMTP): 587

Use the following type of encrypted connection: TLS

Using these details will allow emails to be sent via SMTP from WordPress forms or allow any other SMTP-based plugins to send.
