What does FQDN mean?

Domains · https://computancy.co.uk/kb/what-does-fqdn-mean/

FQDN stands for Fully Qualified Domain Name.

It refers to a complete domain name consisting of a host and domain name.

The domain name itself is comprised of two parts: the second-level domain and the top-level domain.

So, for the example of www.exampledomain.com, 'www' is the host, 'exampledomain' is the second-level domain and '.com' is the top-level domain.
