What kind of tasks are excluded from your service?

Maintenance Packages · https://computancy.co.uk/kb/what-kind-of-tasks-are-excluded-from-your-service/

Our service is primarily dedicated to routine maintenance and site updates, in line with the time allocation specified in your plan.

Tasks beyond this scope, such as web design, specific plugin support, custom post type development, theme development, blog creation, content creation, and creating new layouts, are not included in the standard maintenance package.

However, we are equipped and ready to assist with these tasks. All such additional work will be assessed, quoted, and agreed upon separately.

We aim to cater to most of your website needs with our WordPress care plans while offering comprehensive support and development solutions as needed.
