Where can I view the nameservers of a domain?

Domains · https://computancy.co.uk/kb/where-can-i-view-the-nameservers-of-a-domain/

If you manage your domain name with computancy and have access to it via clients.computancy.uk you can view the nameservers the domain is using by following the steps below.

- Log in to your control panel
- Select **Manage Domains** and locate the domain you'd like to check, select **Manage.**
- Select the **Nameservers** icon to view what nameservers the domain is pointing to.

You can edit and update them here.

Please note that nameserver changes usually take between 6-8 hours - but can take up to 24 hours.
